

4 - 5 pm EDT Tuesday, June 23rd

Best Practices for Digital Phenotyping Research in Aging Populations

Raeanne Moore, PhD

Professor of Psychiatry

University of California San Diego (UCSD)

Co-Founder

NeuroUX

UC San Diego

You'll learn :

- How digital health tools can complement traditional clinic-based assessments by providing intraindividual variability & more
- Best practices for designing digital phenotyping protocols
- Opportunities for digital phenotyping in early detection, clinical trial endpoints, remote monitoring, and personalized care for older adults
