Undergraduate Research Night

Thursday, November 12, 2026 4:30pm to 6:45pm

Curious about research? Discover what's happening across the Manning College of Information and Computer Sciences at Undergraduate Research Night!

Join us for an engaging evening that begins with a panel discussion featuring PhD students with research experience. Panelists will share their research journeys, experiences, answer questions and give advice for undergraduates interested in getting involved in research. The panel will take place in CSL Room 144 from 4:30 PM to 5:15 PM.

Immediately following the panel, explore our Poster Session in the CSL atrium from 5:15 PM to 6:45 PM, where you can meet student researchers, learn about exciting projects across CICS, ask questions, and discover opportunities to get involved. Light refreshments will be served during the poster session.

Whether you're already considering research or simply want to learn more, this event is a great opportunity to connect with the research community and be inspired by the innovative work happening across CICS.
