Startup Recruiting Night 2019

Hindsait: Deploys Artificial Intelligence platforms to transform the Healthcare industry so that patients and healthcare specialists get access to improved care quality and strives to put a check on unnecessary services and fraud.

RaGE Systems LLC: Specializes in wireless systems and product development lifecycles; collaborates with Aerospace and Defense teams to provide state of the art wireless solutions, and engages with companies for product development and aid the development of faster, cheaper and better products.

Sea Street Technologies: Develops AI autonomous operations platforms that enable service providers to transform their businesses to fully autonomous, closed-loop operation, and is engages in automating network, video, telephony, wireless, and enterprise services.

MiCoachee: Revolutionizes the fitness and wellness industry by providing users with an easy to use app and giving them the right insights to reach their fitness goals through the data collection and analysis aided by their app.

Adaviv: Enhances urban(controlled) agriculture by providing hardware enabled predictive agricultural practices and uses AI + computer vision to uncover hidden plant biometrics and translate data into actionable insights for growers.

Uptrust: Uses text messages to communicate with defendants to protect them from unwarranted arrests due to failure to appear in court and seamlessly connects with case management systems to ensure that clients are reminded of their court dates and times.

Agira Photonic: Designs optical films for superior light management. Develops a very low-cost, flat optical collector based on refraction and total-internal reflection at optical interfaces between silicone polymers of different refractive indices.

Starry: Internet Service Providers that strives to provide faster and cheaper internet connectivity solutions through new technology getting past the cables through starry hubs and roof top antennas.

MachineMetrics: Develops AI-driven predictive analytics platform for discrete manufacturers and machine builders, to increase equipment productivity and efficiency through Industrial IoT edge connectivity, real-time visibility, deep manufacturing analytics, and predictive and prescriptive alerts.

AuCoDe: detects online and social media controversy which can affect equity prices through AI based techniques. Funded through the prestigious NSF Small Business Innovation Research (SBIR) grant; aka America's Seed Fund.

Familot: Develops a mobile/web app that organizes photos at the moment they are taken. Provides privacy options, organizing and spotlight options and voice annotations.

Secure AI Labs: Makes sharing critical businesses data safe and easy by protecting it during analysis. Uses advancing encryption technology to protect media files, enable safe and easy data sharing by digitally enforcing data-use policies.

TrueGiven: Provides tools for universities and colleges to support the scholarship emergency fund program.

CheckWriters: Provides Payroll and HR technology solutions by developing modern, easy-to-use software and making HR happy with exceptional personal service and resources.

MK Insights: Psychometrics for hiring and development.

Evie: Mobile platform that allows you to predict live events. We recently began working with The Pub to do live trivia events for basketball games and are doing Game of Thrones as well.
