I understand that this form does not serve as a declaration of the CS minor. Academic minors are declared when the course work for the minor has been completed (or, in the final semester, if course work related to the minor is being competed in the final semester). This form is simply a means for the Undergraduate Program Committee to know of my intent to minor in CS and to track my progress. Submission of this form does not guarantee course enrollment. Once approved, being added to the CS Minors List identifies me for possible course preference and for eligibility to complete the CS Minor. I further understand that flexibility is required when planning my schedules over several semesters in order to complete the minor requirements and that a specific minimum performance is required to remain on the CS Minors List (see website for minor requirements and details).
